2016 VIBRAM FIVEFINGERS CATALOGUE

vibram® fivefingers®

HISTORY

Dear Partners,

For a company that's always been incredibly visionary and forward-focused, it may seem counter-intuitive to celebrate something as nostalgic as a 10-year anniversary.

But this year is more than a milestone for all of us at VFF. It's validation. It's inspiration. It's living proof that a great idea can and will change how people live and play, every single day!

You are the technology.

Ten years ago, Vibram® FiveFingers® revolutionized the shoe industry and ignited a movement. But we didn't set out to do that. At first, we just wanted to solve a problem:

"I wanted to go barefoot in a protected way—because when you can really sense the surface under your feet, your body is able to do what it is designed for by nature."

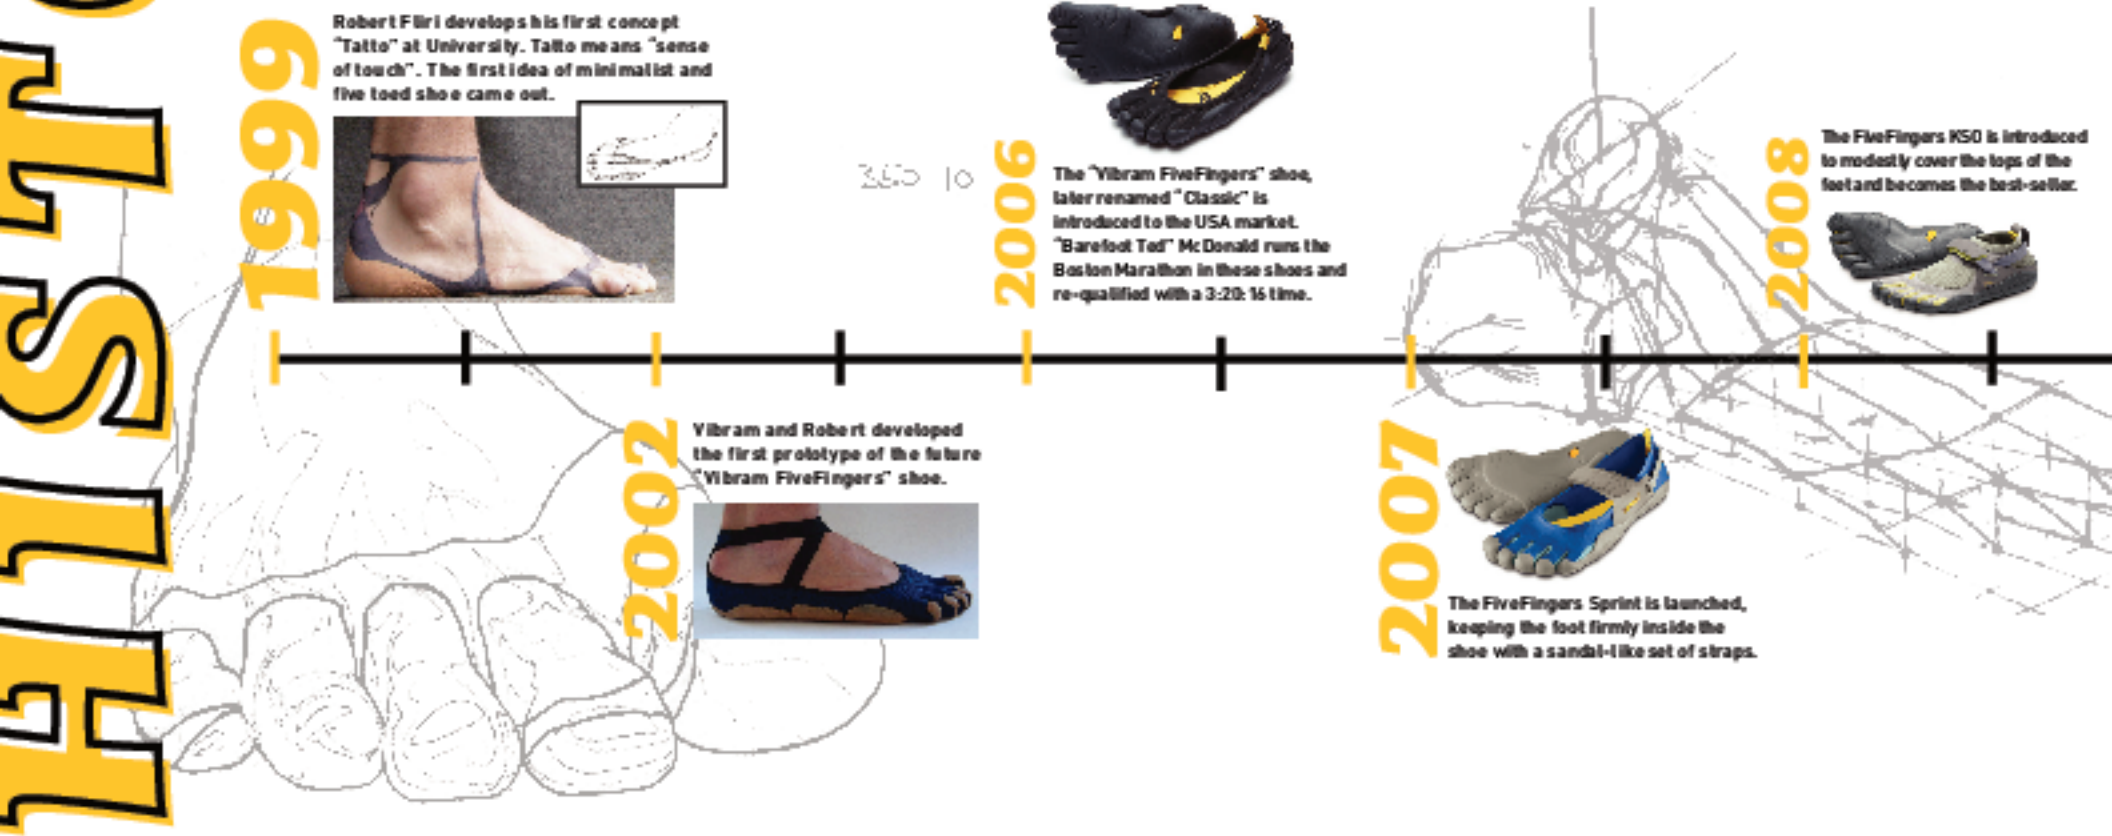
This was the simple yet powerful idea that inspired industrial designer, Robert Fliri, to create the first pair of VFFs. He shared his vision with Vibram's Marco Bramani and the rest is history.

We know, it's the true believers who really built this brand to what it is today. So to honor their loyalty, we are launching a Limited Edition line of VFF Classic and VFF KSO as part of our 10 Year Anniversary. Fanatics everywhere will love owning a pair of these originals.

You'll find the entire 2016 line in the pages of this catalog—our first all-season catalog—representing our shift from a seasonal to an annual launch strategy. It's all here—whether you're a diehard mud junkie, an intrepid trailblazer or wet and wild thrill-seeker. Of course, we never stop innovating. So as new product is developed, we'll launch in real time and you'll be the first to know.

Vibram Partners, it's been ten years since we told the status quo to take a hike. And we aren't looking back. We intend to stay true to our original vision, with innovation that frees human technology. Thank you for sharing our vision.

—Peter von Costa
Product Line Manager of Vibram Finished Goods



1999

Robert Fliri develops his first concept "Tatto" at University. Tatto means "sense of touch". The first idea of minimalist and five toed shoe came out.

2002

Vibram and Robert developed the first prototype of the future "Vibram FiveFingers" shoe.

2006

The "Vibram FiveFingers" shoe, later renamed "Classic" is introduced to the USA market. "Barefoot Ted" McDonald runs the Boston Marathon in these shoes and re-qualified with a 3:20:16 time.

2007

The FiveFingers Sprint is launched, keeping the foot firmly inside the shoe with a sandal-like set of straps.

2008

The FiveFingers KSO is introduced to modestly cover the tops of the feet and becomes the best-seller.

ROBERT FLIRT'S ORIGINAL SKETCHES OF CONCEPT FOR FIVEFINGERS

2010

Vibram FiveFingers introduces the first Minimal running shoe: the Bikila, inspired by historic barefoot running.

2011

Vibram FiveFingers launches into the Fitness market with the Komodosport – a graphically tattooed VFF.

2012

The Spyridon a shoe for off-road running with 3D Cocoon technology, is launched by VFF. The Seey, also makes it's own debut, the lightest shoe in the running collection.

2013

New core Minimal shoes introduced are the EL-X and the Alitza each having a stretch fit. New water shoes are introduced: the Signa and Maiori, as well as the first Children's collection. The company's first Water Resistant running shoe is launched with exclusive Wit technology.

2014

New generations of best selling categories are launched: Bikila EVO and KSO EVO, as well as a new women's ballerina, the Vi-B. The first Waterproof FiveFingers is launched.

2015

Vibram introduces a new performance rubber compound: Megagrip, and the new Trek Ascent outdoor collection in FiveFingers. Additional cushioning abounds in the Vybrid Sneak and KMD EVO products.

TECHNOLOGY

VIBRAM SOLE TECHNOLOGY

High Performance Rubber Soles: Vibram® rubber compound formulations and tread designs are world renowned for their performance in challenging conditions. FiveFingers are no exception.

This season, our new Spyridon MR Elite is designed with our Vibram® MEGAGRIP compound, which delivers confident grip in all conditions—perfect for mud-runners.

The Bikila EVO 2 maximizes energy conservation by using Vibram® VI-LITE EVA to absorb shock and Vibram® XS RUN to provide expansive ground contact, high grip and a firm stability no matter what the temperature.

VI-LITE

Vibram® VI-LITE features the ultimate in lightweight, shock absorption cushioning, for maximum energy conservation.

ICETREK

Vibram® ICETREK was developed to provide unparalleled grip on cold, icy, or snow covered surfaces. The soft rubber compound in combination with uniquely designed lugs allows ICETREK soles to move swiftly on various icy surfaces.

WAVEGRIP

Vibram® WAVEGRIP offers the best grip on marine surfaces. WAVEGRIP is a non-marking rubber compound with micro-siping and drainage channels. The softness of the compound allows it to adhere to smooth gel coat, stainless steel, and wet wood without jeopardizing durability.

MEGAGRIP

Vibram® MEGAGRIP offers excellent grip properties on both dry and wet terrains while maintaining a high level of durability. Developed for the user who frequently encounters slippery surfaces, MEGAGRIP offers an incomparable combination of grip and durability.

XS TREK

Vibram® XS TREK is a technical compound that allows great overall performance qualities, in particular flexibility and wet traction. Highly responsive to the various demands of life, XS TREK will carry you from the trail to the urban playground and even to the indoor activities, thanks to its non-marking feature.

3D COCOON Embedded in the outsole, this thin and flexible mesh disperses ground pressure by distributing impact. Flexible but protective enough to traverse safely over uneven ground, the end user experiences ground feedback with less bite.

MONT

Vibram® MONT compound formulation is optimized for mountaineering, trekking, acrobatic, works, and motorbike racing. MONT is used to conquer the highest peaks in the world by offering the highest reliability on the most difficult terrains at low temperatures.

XS RUN

Vibram® XS RUN provides a maximal stable hardness across a broad temperature range and the softness of the compound allows for expansive ground contact and grip across lug surfaces. XS RUN also provides high grip on smooth surfaces.

ORIGINALS

Classic Original

10TH ANNIVERSARY RE-INTRODUCED PRODUCT
*limited release

WEIGHT: M43= 6.00oz W38= 4.59oz
SOLE SPEC: INSOLE: Polyester Microfiber // MIDSOLE: N/A // RUBBER: 3.5MM
UPPER MATERIAL: Stretch Polyamide
VEGAN // Machine Wash Cold / Air Dry

From day one, The FiveFingers Classic has drawn the attention of the press and active outdoor athletes alike. Our patented original takes a minimalist approach to barefooting with a thin, abrasion-resistant stretch polyamide fabric that sits low on the foot for comfort and quick drying. Non-marking, razor-siped Vibram XS Trek performance rubber soles help protect your feet and provide a sure grip over a variety of terrain.

KSO Original

10TH ANNIVERSARY RE-INTRODUCED PRODUCT
*limited release

WEIGHT: M43= 5.90oz W38= 4.71oz
SOLE SPEC: INSOLE: Polyester Microfiber // MIDSOLE: N/A // RUBBER: 3.5MM
UPPER MATERIAL: Stretch Polyamide, Polyester, Hypalon®
VEGAN // Machine Wash Cold / Air Dry

When you're scrambling up a rocky bluff or bounding along a riverbank, the last thing you want is gravel and grit seeping into your FiveFingers. The KSO is an all-new design with thin, abrasion-resistant stretch polyamide and breathable stretch mesh that wraps your entire forefoot to "Keep Stuff Out". A single hook-and-loop closure helps secure the fit. Non-Marking XS Trek performance rubber soles are razor-siped for sure grip.

RUNNING

Bikila EVO 2

NEW PRODUCT

WEIGHT: M43= 4.80oz W38= 3.74oz
SOLE SPEC: INSOLE: 2MM Anti-Microbial Drilex Sockliner // MIDSOLE: 4MM EVA // RUBBER: 2.5MM
UPPER MATERIAL: Polyester Lycra Stretch Mesh + Polyester Microfiber
VEGAN // Machine Wash Cold / Air Dry

Redesigned with a softer upper and perforated to maximize breathability, the Bikila EVO 2 is now even more comfortable. This is an ideal running shoe for those making the transition from traditional to minimalist shoe. The thinner sole lets you feel your run, connecting you to the true barefoot running experience.

Spyridon MR Elite

NEW PRODUCT
WEIGHT: M43= 7.54oz W38= 5.49oz
SOLE SPEC: INSOLE: 2MM EVA + Anti-Microbial Drilex Sockliner // MIDSOLE: N/A // RUBBER: 5MM + 3D Cocoon Mesh
UPPER MATERIAL: Injection PU Brace + Polyester with Water Repellent Treatment
VEGAN // Machine Wash Cold / Air Dry

A purpose-built shoe designed specifically for die-hard mud-runners, the Spyridon MR Elite is why Vibram was named the Official Footwear Sponsor of the 2015 Warrior Dash. The in-step brace provides a confident "lock" for stability even when the shoe is wet, while the high hook-and-loop cuff keeps mud out and protects the ankle. A totally washable shoe, the water-resistant finish makes the Spyridon MR Elite a relentless competitor in all conditions.

FITNESS

KMD EVO

WEIGHT: M43= 7.40oz W38= 5.64oz
SOLE SPEC: INSOLE: 2MM EVA + Anti-Microbial Drilex Sockliner // MIDSOLE: 6MM EVA // RUBBER: 3.8MM
UPPER MATERIAL: 100% Low Elastic Polyester Filament
VEGAN // Machine Wash Cold / Air Dry

The new KMD EVO defies gravity (and conventional wisdom), allowing athletes extraordinary freedom for dynamic movement both in the air and on the ground. For fitness fanatics without boundaries, the KMD EVO transcends traditional sport, making it the ideal leaping, climbing, balancing shoe for those seeking a minimal shoe experience with maximum flight potential.
