## Another Deuter is born here

Deuter products are not conceived behind a desk but rather exactly where they will spend the rest of their life – in the outdoors. They are born in the minds of our active collection experts, athletes, and numerous professional mountain guides. **Welcome to Deuter.**

HISTORY

## GERMAN ENGINEERED SINCE 1898.

*The Deuter brand is focused on innovation, quality and sustainability while the products stand for fit, ventilation and function. We offer more than just a product, see our company timeline below.*

company logo 1900

**1898 Augsburg, Germany.** The company is founded by Hans Deuter. At the turn of the century Deuter is commissioned to supply the Royal Bavarian Post Office with postage bags and mail sacks.

**1905 Expansion** The "mechanized sailcloth and linen weaving, sackcloth, freight, car and horse blanket manufacturing firm" expands and now also includes a rental service for tents.

**1910 First major client** Satchels, backpacks, knapsacks, belts, mess and store tents are increasingly in demand.

**1919 The founder Hans Deuter** operates the company under his name and produces suitcases, backpacks, tents and truck canopies.

**1934 Himalayans expedition** The "Tauern" backpack proves its worth at the **Himalayans expedition to the Nanga Parbat**.

**1938 Anderl Heckmair** is the first to conquer the Eiger North face (on July 22.-24.) accompanied by Ludwig Vörg, Fritz Kasperek, and Heinrich Harrer. On his back: a Deuter rucksack.

**1953 Hermann Buhl** carried a Deuter backpack on his famous first ascent of the Nanga Parbat (8.125 m). While his companions turned back, Buhl continued by himself – and left his Deuter pack at a secondary peak.

**1957 The family business becomes** a joint-stock corporation. The company is now called "Deuter Industriewerke AG-Augsburg."

**1962 The tent division becomes an independent company** "Deuter Hallenbau GmbH, Augsburg." One of many expeditions equipped by Deuter reaches the summit of the Nanga Parbat via the extremely difficult Diamir face.

**1984 Deuter AIRCOMFORT back system is born:** The original ventilated back system is born and patented. It revolutionizes the backpack market and becomes the most famous back system worldwide.

**1989 Separate ways,** two product segments, travel and backpacks, split from the main company "Deuter AG" and become "Deuter Sport & Leder GmbH".

**1996** Deuter engineers the first TÜV approved child carrier.

**1997** Deuter partners with the **German Ski and Mountain Guide Association** and solicits product feedback.

**2001 Deuter goes international** and establishes a new subsidiary in the United States: Deuter USA Inc.

**2005 The SL Women's Fit** backpack program is further extended and becomes a coherent women's collection managed by a professional, independent team.

**2006 Schwan Stabilo,** a family owned German Company, purchases Deuter. The company is now is now called "Deuter Sport GmbH & Co. KG."

**2006** Deuter's product development team gets further professional support by the **American Mountain Guide Association**.

**2010** Deuter, a worldwide company represented in over 44 countries around the world. Visit [www.deuter.com](http://www.deuter.com) for more information.

Deuter...outfitting adventure for over 110 years.

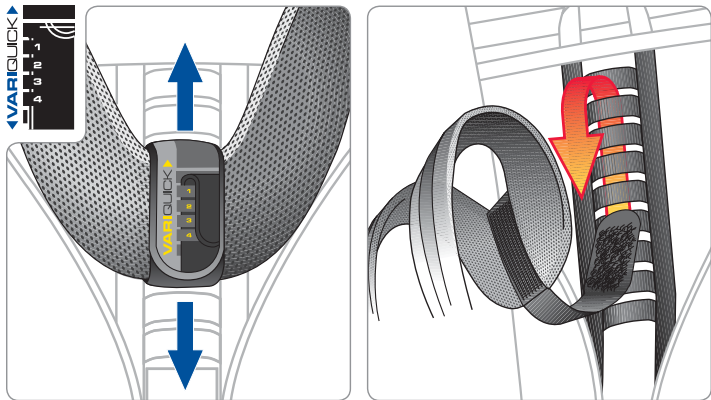

# Deuter Quality Basics

DEUTER PRODUCTS ARE ENGINEERED TO LAST A LONG LIFESPAN AND THE FOCUS IS ON SUPERIOR QUALITY AT ALL LEVELS. SOME OF THE DETAILS INCLUDE:

## VARIQUICK

Create your custom fit by making your individual height adjustment. For differing back lengths, easily follow these steps of adjustment.

- Estimate the correct position of the harness on the back.
- Unfasten and pull out the Velcro closure from the “webbing ladder”
- Put the harness strap into the right position, then slip the strap through (4) attachment loops. [Using less than 4 attachment loops could cause instability while carrying, and possibly the Velcro closure to detach from the pack during carrying.]
- Fold over the strap and secure the Velcro closure.

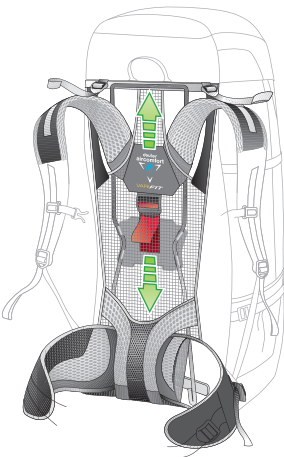

## VARIFIT

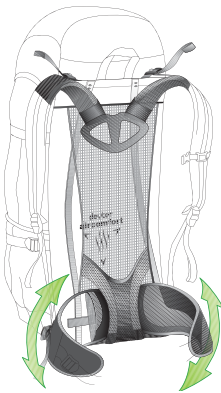

Found exclusively on the new generation of the Futura Vario Series.

Your exact custom fit is achieved by making effortless height adjustments. Follow these fast and efficient easy steps of adjustment.

- Estimate the correct position of the harness on the back.
- Reach through the side of the ventilated back system and loosen the ladder lock.
- Position the harness strap into the right position.

## VARIFLEX

## VARIQUICK

The pivoting VARIQUICK hip belt will follow every movement by moving with you. By pivoting at the center of the lower lumbar pad, this system helps you keep your balance and maintain energy on difficult terrain.

## SEAM BINDING

Internal seam binding prevents fraying and is a key element in the design of a lasting durable product. Binding creates an inner frame supporting the pack’s stability.

## SEAM AND STRAPS

Deuter products are strong and durable because the pack seams are multiple sewn. In key areas bar tacking is used for added strength. To prevent fraying the straps are heat sealed.

## QUALITY BUCKLES

Thoroughly tested quality buckles are exclusively used in the entire backpack range. They last a lifetime.

## DOUBLE-LAYERED BASE

Every Deuter backpack is equipped with a double-layered base making it extremely hard wearing and durable.

## REINFORCED DRAWCORDS

Our reinforced draw cord closure prevents wear, tear and fraying. This signature feature ensures the cord will not get jammed.

## ORIGINAL YKK® ZIPPERS

Are currently the best and most reliable zippers available and are used on Deuter packs. These top quality zippers are very robust and reliable.

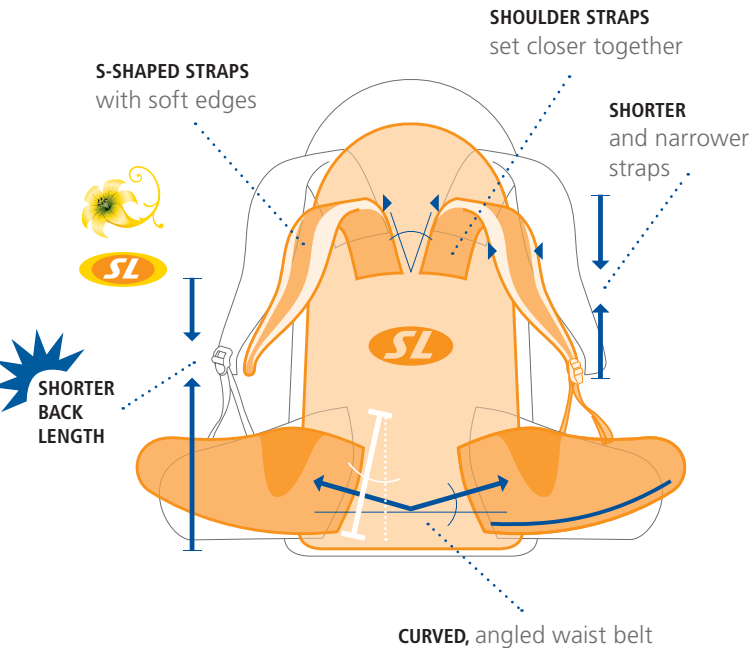

## SL FIT SYSTEM

“SL” stands for Slim Line, and these versions are far from being just men’s models in feminine colors. The entire pack, including the carrying system, is perfectly adapted to a woman’s physique.

A conical shape of the hip The SL waist belt anchor points are set closer together and are slightly curved angling diagonally upward. The hip belts are pre-shaped so that the fastened hip belt has a conical shape. This shape and positioning provides a customized fit..

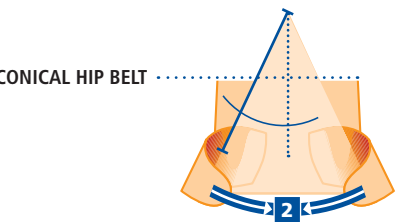

A narrower shoulder width provides a perfect anatomic fit around the upper body and they stay in place. SL shoulder straps are both narrower and shorter in length, have narrow tapered ends and smaller buckles. They avoid chafing in the armpits and eliminate pressure points in the chest area.

A more sensitive chest is why the SL shoulder straps have an S-shape and feature softly lined edges on both sides.

## WHO ELSE CAN WEAR SL?

Our SL packs are designed to fit the average athletic female, but they are also great for slim men and younger guys. Jordan Romero used an ACT Lite 60+10 SL on his successful bid to become the youngest person ever to climb Mt. Everest at 13 years old!!

## Deuter Aircomfort Systems

The Aircomfort system comes in multiple versions, which are designed with all-around, lightweight, or heavy-load use in mind. But, they all have one thing in common: they reduce sweating, and thus enhance athletic performance. **Perspiration is reduced by up to 25%** - this has been tested and verified by the renowned German Hohenstein Research Institute.

Carrying comfort for hikes and long treks

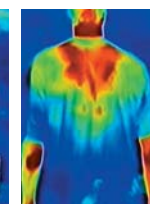

## Deuter Aircontact Systems

By aligning the pack's center of gravity closely to the body's center of gravity, the AIRCONTACT System provides full load control, and evenly spreads its weight. The back padding is made of breathable hollow chamber foam, which allows a snug fit while providing great ventilation. **Perspiration is reduced by up to 15%** - confirmed in a field test conducted by Gabriel L. & T. in cooperation with the University of Erlangen.

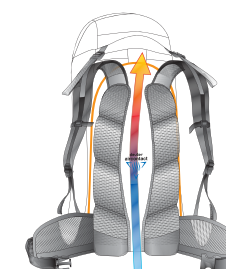

without  
Aircontact

with  
Aircontact

**FACT:** 15% less perspiration than a conventional trekking backpack, from a reduction in heat build-up **between pack and wearer's back** by up to 5°C.

**RESULT:** better performance and an increase in user comfort.

# Deuter Aircontact Systems

## AIRCONTACT ACT Lite SYSTEM

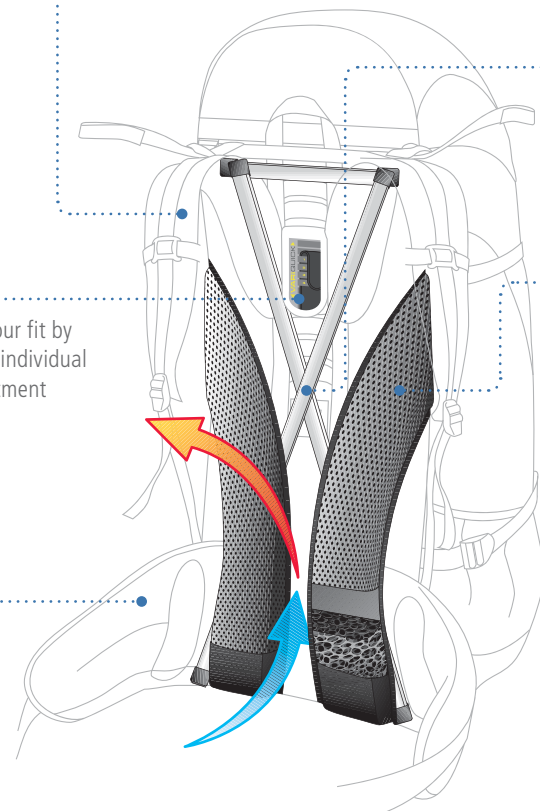

Anatomically Shaped shoulder straps with 3D-AirMesh cover

**VARIQUICK**  
Customize your fit by making your individual height adjustment

Anatomically Cut Hip Belt with bilaminate foam provides great load transfer & offers freedom of movement

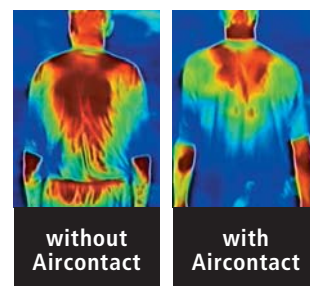

Anatomically Shaped X-frame creates a comfortable, flexible construction for medium to heavy loads

Breathable Hollow Chamber Foam blends superior ventilation via a pump effect that circulates air through the cushions. The result is a snug fitting, stable carry and a reduction of perspiration by 15%

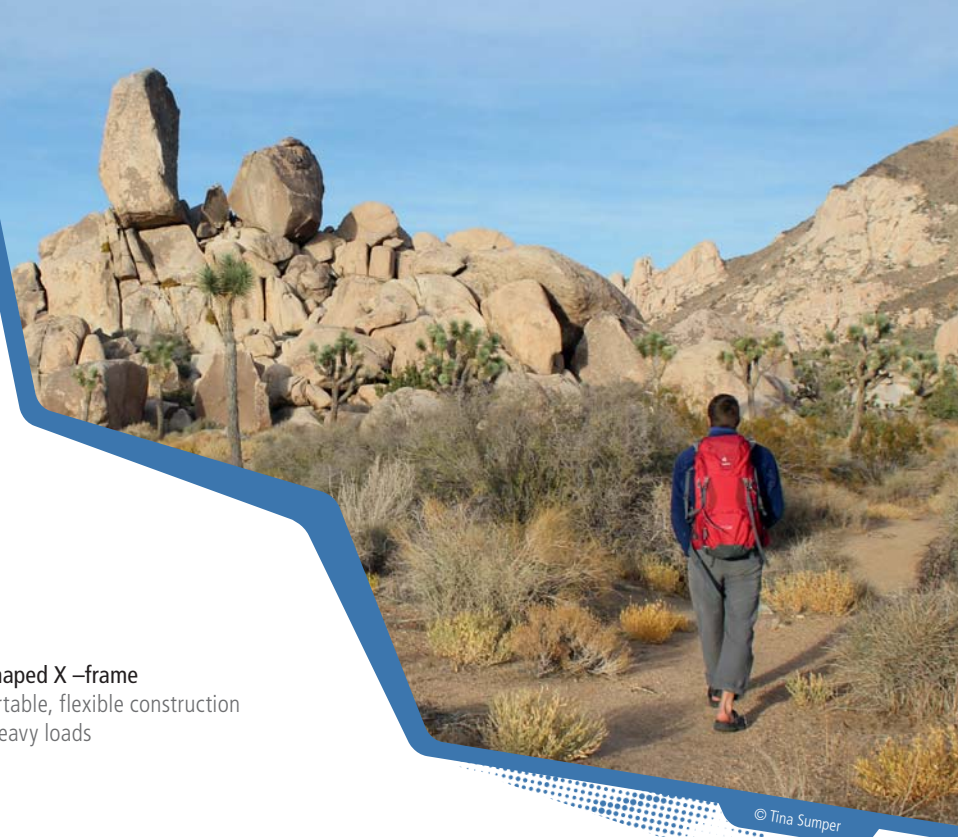

Alternative VARIQUICK Shoulder Harnesses available to customize fit. See page 57.

**FACT:** 15% less perspiration than a conventional trekking backpack, from a reduction in heat build-up **between pack and wearer's back by up to 5°C.**

**RESULT:** better performance and an increase in user comfort.

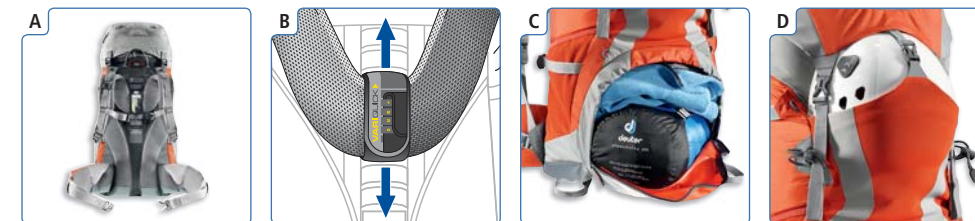

© Tina Sumper

Less Weight, More Energy

## Deuter Lite System

The Lite series is specifically designed for fast endurance activities, like alpine day trips, trail runs, an minimalist summit pushes. Reduced on the essentials, it still provides great carry comfort for light to medium loads, and can even make an all-around travel companion with it's great packability.

page 41

### LITE SYSTEM

Usage: Hikes / Ski Tours / Climbing

Volumes: 10-30 L

Favorite Feature: Removable Delrin™ Frame Rod

### WHY LITE?

- **Low weight, but not at the expense of strength and durability:** our Lite range features hard-wearing material, quality workmanship, and smart constructions. **The weight is reduced by using state-of-the-art fabrics and focusing on the essentials.**
- Deuter's LITE packs have an outstanding weight-to-function ratio.
- Removable Delrin® U-frame guarantees carrying comfort and minimum weight.
- Deuter uses fine 100 den and 210 den Nylon material for the lightweight products. The **extremely tight weave makes the material guarantee improved tear strength.**
- Whether a rain jacket in summer or skins in winter – there is always something to quickly store in the large **front stuff-it pocket** of the Speed Lite 20 and 30.
- **Small and packable** – Deuter's LITE packs fit in any trekking pack or travel luggage. Easy to take along on city trips, climbing tours or as a summit pack.

## Deuter Lite Systems LITE SYSTEM

**Padded Back**  
with snug fit, covered with  
breathable 3D Wide-AirMesh

**Lightweight**  
For anyone looking to go  
VERY LIGHT and VERY FAST,  
this series fits the bill.

Mesh Hip Belt Pockets on Speed Lite 30

**Flexible, Tensioned Delrin® U-frame**  
for lightweight stabilization and flexibility. Can be  
removed for shedding extra grams or better storage

### Speed Lite 10-15

These small, and stowable do-it-all packs have an outstanding weight-to-function ratio and are ideal for climbing, ski tours, running, cross-country skiing and city trips.

## Deuter Alpine Systems

A backpack system for alpine use has to be tailored for the most demanding conditions: it has to provide superior wearing comfort, durability, function – all this packed in a nonfrills, minimum weight pack. Deuter's Alpine Back System meets all those high-tech demands while **Perspiration is reduced by up to 15%.**

### ALPINE SYSTEM

Usage: Climbing / Alpine Climbing & Mountaineering / Backcountry Skiing/Snowboarding / Snowshoeing

Duration: 1-3 Day

Volumes: 28-45 L

Favorite Feature: Snug Fit for Performance Movement

## Deuter Alpine Systems ALPINE SYSTEM

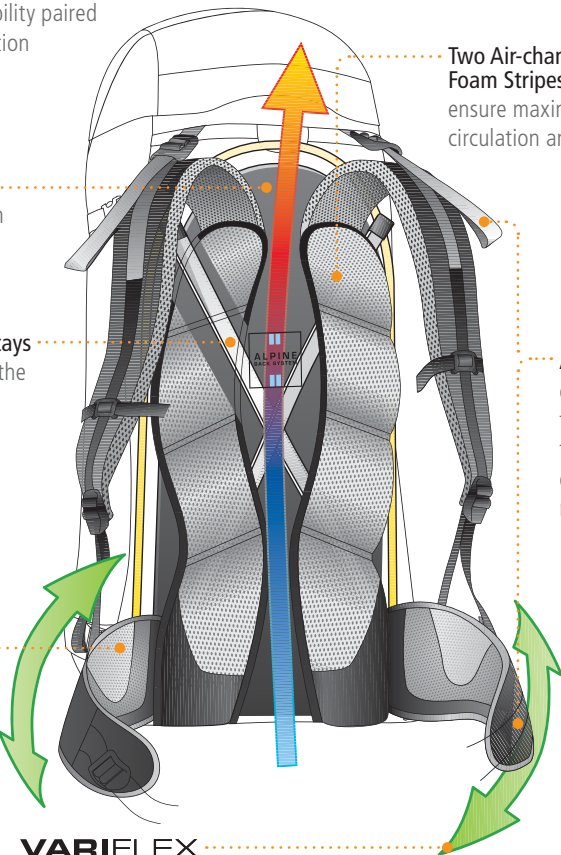

### Alpine

Meets the demands of technical pursuits, and guarantees excellent and safe load carrying ability paired with comfortable ventilation

**Removable Foam Mat** supports the back system and can be used as seat

**Removable Aluminum Stays** are crossed and transfer the load to the hip belt

**Removable Hip Belt** enables pack weight reduction, and gets it out of the way of the climbing harness (optional stability waist strap included)

**Two Air-channeled Foam Stripes** ensure maximum air circulation and stability

**Adjustment Straps** on the shoulder straps and the hip fins allow fine-tuning for different terrains. Looser = more comfort during approaches; Snugger = more precise load control.

### VARIFLEX

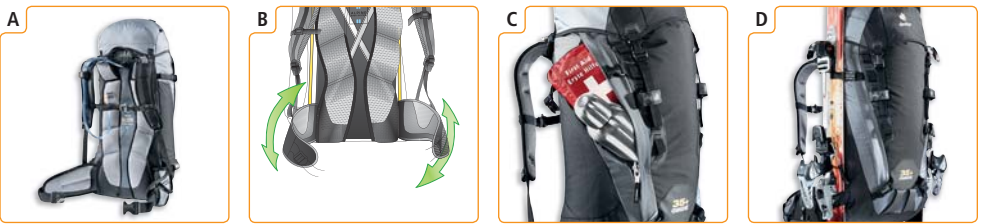

Pivoting hip belt will follow every movement and helps you keep your balance and maintain energy on difficult terrain

## Guide 35+ - 45+

Functionality, durability and comfort define the Deuter Guide Series. These top loading alpine packs can be customized to your needs for mountaineering, climbing and skiing.

### Features >

**A** ALPINE Back Systems » **B** VARIFLEX Pivoting Hip Belts » **C** Side Access Zipper » **D** Wide Ski Slots (130mm) » Removable Foam Mat, Hip Belt & Stays » Two Air-channeled Foam Stripes » Aluminum X Stays » Modern Ice Tool Attachments » Spin-drift Collars » Optional Under-lid Rope Strap » Hydration Compatible » Under-lid Valuables Pocket » Hip Belt Gear Loops » Optional Stability Waist Strap » Height Adjustable Lids » SOS Labels » Pull Forward Hip Belt Straps » "SL" Women's Specific Fit on 40+ SL » Bottom Compartment Access with Internal Zip Divider (Guide 40+ SL and 45+ only)

## Freerider Pro 28 SL - 30

The Freerider Pro series brings together the hallmarks of Deuter tradition- durability, functionality, and great features. Options galore for carrying your winter backcountry setup; you can lash snowboard, snowshoes, or skis vertically to the front, or carry skis as A-frame or diagonally. The full back panel opening with heavy-duty zipper allows access to the main compartment while lashed-on gear blocks access from the front. It also allows you to get in without letting the snow in! Also, the comfortable VARIFLEX pivoting hip belt will follow your natural movements.

**Features »**

**A** ALPINE Back System » **B** Full Back-entry hemispherical zipper (on Freerider Pro 28 SL and 30 only) » **C** Vertical snowboard carry » **D** Side Straps Allow Ski Carrying (diagonal ski carry possible on Pro 28 SL and 30) » Snow-shedding Stretch Side Pockets » Removable VARIFLEX Pivoting Hip Belt on Pro 28 SL and Pro 30, and Stowaway Neoprene Hip Belt on 26 » Large Front Shovel Compartment w/ Probe/Handle Sleeve » 3 Internal Valuables Zip Pockets » Fleece-lined Goggle Top Pocket » Hydration Compatible » Two Removable Tool Loops » Detachable Full Face Helmet Holder Included with Pro 28 SL and 30 » “SL” Women’s Specific Fit on 28 SL

# Streamer™ Reservoirs

The Streamer™ reservoirs are a lightweight and compact alternative to the traditional water bottle, and can be easily cleaned with just warm water and your hand. Make sure to not clean with anything that can scratch the inner smooth surface. Unlike most hydration systems which are made from Polyurethane, Streamers™ are made from Polyethylene, which results in a taste free hydration system.

## Features >

- A** Polyethylene for Taste Free Reservoir and Tube » Smooth Glass Like Finish Retards Microbial Growth »
- B** Leak Free Manual Shut- Off Helix Bite Valve with Dirt Guard »
- C** Orange Closure Clip can be Inserted to Closure System to Prop Reservoir Open for Faster Drying » Silver Ion Antimicrobial Grunge-Guard Technology » Detachable Hose for Easier Cleaning
