CONCEPT>

The comfortable and very durable Stone Jacket is our most innovative jacket, suitable for climbing or hiking even the most difficult routes. It is cool, comfortable and stretchy, with Cordura® threads woven into the structure of the fabric to provide maximum tear resistance and freedom of movement.

FABRICS>

Produced with the very innovative K-Stretch Plus, a mid-weight, DWR-treated fabric that is both water and dirt-repellent. It stretches, with a smooth and structured look where the Cordura® thread is, and it is cool, light and durable, for total freedom of movement. All the zippers on this garment are YKK®.

FEATURES>

The simple shaped hood with a trimmed edge is designed to be worn under a helmet. Front zipper with an internal flap forming a garage. Two zippered pockets with zip garage. Sleeve edge with elastic band. Bottom edge with adjustable drawstring. The Cordura® strips are placed on the shoulders and upper sleeves, on the lower part of the back, on the front, the side and on the upper part of the collar, where the wear is highest.

CONCEPT>
This very innovative shirt is comfortable and durable on the front and shoulders, very cool and breathable in the back and sleeves. It is suitable for long hikes or casual wear, thanks to its technical, cool and colorful look.

FABRICS>
Produced with the very innovative K-Sense Plus, a lightweight fabric treated to promote wicking, and with the K-Stretch Plus fabric, which is both water and dirt-repellent thanks to the DWR treatment. It is stretchy and durable, with a smooth and structured look where the Cordura® thread is. Cool and light where the square is, for total freedom of movement. The garment has YKK® zippers.

FEATURES>
Front closure with snap fasteners.
Front pocket with minimalist zipper.
The Cordura® strips are placed on the shoulders and on the upper front, where the wear is highest.
Printed back.

CONCEPT>
Our comfortable and very durable Free Shape Stone Short is our most innovative short, suitable for the most difficult situations. Cool, comfortable and stretchy, with Cordura® reinforcements to confer maximum tear resistance and freedom of movement. Suitable for hiking or for adventure biking in combination with the liner short with seat pad and with the possibility of inserting protection.

FABRICS>
Produced with the very innovative K-Stretch Plus, a lightweight, DWR-treated fabric that is both water and dirt-repellent. They stretch, with a smooth and structured look where the Cordura® is and are cool and light, for total freedom of movement. All the zippers on this garment are YKK®.

FEATURES>
Open belt with quickly operated zipper and an internal hook to avoid points of entanglement outside.
Two open front pockets.
One front pocket with small zipper and an internal mesh.
Side zippers with internal bellows structure housing the protections.
Adjustable elastic band at the waist.
Reflective inserts.

STORM

PANT

168

CONCEPT>
Technical three-layer Hard Shell jacket for mountaineering and climbing. Waterproof, highly compactible, extremely breathable and stretchy. The hooded Storm is the garment you always need to have with you.

FABRICS>
The K-Dry membrane ensures a 20,000mm water column with breathability of 10,000g/m2/24 hours. The DWR finish helps repel water and dirt from the surface of the fabric. The double layer at the bottom keeps out rain that could enter from the pants. The 15 mm tape inside allows for improved breathability and a better appearance outside, with reinforcement in key points. All the zippers are YKK®. It has a technical fit, characterized by clean lines, and a carefully designed pattern to minimize the seams and taping.

FEATURES>
The hood is worn over the helmet, with a draw cord in the back for adjustment. Rigid visor with lining inside the hood. Waterproof front zipper and pockets for greater protection. Waterproof flap behind zip with fabric to protect chin. Pockets with waterproof zip, with trim and garage in Kortec. Double layer at bottom of jacket with adjustable draw cord. Adjustable Velcro closure at wrist.

CONCEPT>
Technical three-layer HardShell pant for mountaineering. Waterproof, highly compactible, extremely breathable and stretchy. The Storm pant is the garment you always need to have with you. You can put it on and take it off without taking off your boots.

FABRICS>
The K-Dry membrane ensures a 20,000mm water column with breathability of 10,000g/m2/24 hours. The DWR finish helps repel water and dirt from the surface of the fabric. The 15 mm tape inside allows for improved breathability and a better appearance outside, with reinforcement in key points. All the zippers are YKK®. It has a technical fit, characterized by clean lines, and a carefully designed pattern to minimize the seams and taping for greater freedom of movement.

FEATURES>
Elastic waistband adjustable in back. Full side zip with double sliders for increased breathability. Front pocket with zip. Bias-cut fabric on knee and seat for greater stretch.

314

168

CONCEPT>
2.5-layer HardShell jacket. The Vetta Evo jacket is completely seam sealed, waterproof, compactible and breathable. It has an adjustable hood and stretch inserts to facilitate movement.

FABRICS>
The K-Dry membrane guarantees a 20,000mm water column with breathability measured at 18,000g/m2/24 hours. The DWR finish helps repel water and dirt from the fabric surface. The internal 15mm tape promotes better transpiration and better outward look. All the zippers on this garment are YKK®. It has a technical fit characterised by spare lines, carefully designed to reduce cuts on the garment to a minimum and reduce the taping. The stretch inserts on shoulders and hem increase the freedom of movement.

FEATURES>
The hood is to be worn over the helmet and is adjusted by means of a drawstring at the back. The visor is stiff.
The front zippers are waterproof for increased protection.
Waterproof flap under the zipper, with fabric chin protection.
Pockets closed by a waterproof zipper.
Adjustable drawstring at the hem.
Sleeve edge adjustment toggle.
Protected air vent at the back.
Stuff sack.

CONCEPT>
2.5-layer HardShell jacket. The Cima jacket is completely seam sealed, waterproof, compactible and breathable. It has a hood and adjustable elastic drawstrings.

FABRICS>
The K-Dry membrane guarantees a 10,000mm water column with breathability measured at 10,000g/m2/24 hours. The DWR finish helps repel water and dirt from the fabric surface. 15mm internal tape. All the garment's zippers are YKK®. Elastic trim at the bottom and on sleeve ends.

FEATURES>
The hood is to be worn under the helmet and is adjusted by means of elastic stitching. The visor is stiff.
The front zippers are waterproof for increased protection.
Waterproof flap under the zipper, with fabric chin protection.
Pockets closed by a waterproof zipper.

SELLA

JACKET

NEW

CONCEPT>
The Wall is a windproof, water-repellent SoftShell jacket with a thermal lining. Warm and lightweight, it is ideal for use in varied conditions.

FABRICS>
The DWR finish helps repel water and dirt from the surface of the fabric. The hood, the sleeves and the shoulders feature K-Shell fabric with a waffle design with a 1,000mm water column. The sides are in stretchy K-Shell for greater comfort and breathability. Mesh inserts in the lining further increase breathability. All the zippers are YKK®.

FEATURES>
The hood is worn over the helmet and the stretch stitching makes it self-adjusting. Vislon® zipper for quicker opening. The flap behind the zipper forms the garage. Two pockets with zip and garage with minimalist look. Adjustable draw cord at bottom of jacket. Elastic trim on bottom of sleeve.

CONCEPT>
The Sella Jacket was designed for cycling and general outdoor use. Perfect for cooler days in the summer, the jacket stows easily in your backpack.

FABRICS>
Jacket made with wind-resistant, water-repellent and slightly stretchy K-Shell on the shoulders, with the outer surface embossed with high abrasion resistance. Front quilted with PrimaLoft® Silver Active 40g. Stretch panels on the sides, underside of sleeves and at the center of the back for greater breathability and comfort.

FEATURES>
YKK® Vislon® zipper in front for quick opening. Front wind flap with zip garage. Two front pockets with YKK® zippers. Large back pocket with YKK® zipper. PrimaLoft® Silver Active 40g insulation in front. Stretch cuffs on sleeves. Draw cord and stretch trim at bottom of garment. Reflective detailing on back and on front pockets. Printed logo on sleeve and back.

CONCEPT>
Windproof, with detachable sleeves that do not hinder movement. This garment can be used as a jacket or a vest, while climbing or simply hiking uphill or downhill, in spring and also in summer, in the mountains, every time dynamic and comfortable protection is required.

FABRICS>
Elastic and breathable K-Shell jacket reinforced with Cordura® at the elbows, with detachable sleeves. It offers good temperature regulation also in very cold weather. The two-way-stretch fabric inserts under the sleeves and back enhance the wearer's freedom of movement. No-slip silicone print on the shoulders. All the zippers on this garment are YKK®.

FEATURES>
Vislon® zipper on the front for quicker opening. Windproof front flap. Chest pocket closed with a minimalist zipper. Two front pockets closed with minimalist zippers. Adjustable drawstring at the bottom. Sleeve zippers in a different color to make reassembly easier.

CONCEPT>
The multifunctional Parete Vest is perfect for any summer outdoor activity; its technical characteristics also allow it to be used for aerobic activity in the winter.

FABRICS>
Vest in wind-resistant, water-repellent and slightly stretchy K-Shell. Embossed outer surface with high abrasion resistance.

FEATURES>
Shaped collar for increased comfort. YKK® Vislon® zipper for rapid opening. Wind flap. Two front zippered pockets. Draw cord and elastic trim at bottom of garment. Four-needle stitching for increased comfort. Karpos wordmark printed on back.

CONCEPT>
Our lightest and most compactible completely waterproof jacket. Take the Lot Rain Jacket along on every mountain excursion, whether you are climbing, hiking or ski mountaineering in the winter. It will keep you completely dry and help you maintain a constant body temperature when it starts to rain or snow or turns cold. This jacket was developed and tested by mountaineer Ueli Steck on his most challenging climbs.

FABRICS>
Extremely lightweight 2.5-layer 100% nylon fabric, 50g per square meter, with a 20,000mm water column and 20,000g/m2/24h breathability. The DWR treatment helps repel water and dirt from the surface of the jacket. Made with waterproof YKK® zippers. The tape used for sealing the seams is 15mm for improved breathability and lighter weight.

FEATURES>
Hood with rigid visor and wind seal around face, adjustable with a draw cord in back.
Waterproof YKK® zipper in front with 3mm chain for lighter weight.
Waterproof zipper flap with zip garage.
Chest pocket with waterproof YKK® zipper that can be used as a stuff sack for the jacket.
Chest strap with botton to limit opening when the zipper is open. Adjustable draw cord at bottom.
Shaped no-sew cuffs for greater protection.
Karpos wordmark on back of left shoulder and logo on right sleeve.

CONCEPT>
Our lightest and most compactible completely waterproof pant. The Lot Rain Pant is ideal for any mountain excursion, whether you are climbing, hiking or ski mountaineering in the winter. It will keep you completely dry and help you maintain a constant body temperature when it starts to rain or snow or turns cold. This pant was developed and tested by mountaineer Ueli Steck on his most challenging climbs.

FABRICS>
Stretchy K-Dry fabric with a membrane, with a 20,000mm water column and 20,000g/m2/24h breathability. The DWR treatment helps repel water and dirt from the surface of the fabric. The seam-sealing tape inside is 15mm for improved breathability and lighter weight. Uses YKK® zippers.

FEATURES>
Waterproof YKK® side zippers to knee.
Elastic waistband with draw cord on inside.
Stretch panel on upper back for greater breathability and improved fit.
Inside pocket at back to be used as a stuff sack.
Elastic at bottom of legs.

K-SHELL	

299

CONCEPT>
Our lightest-weight jacket. In very little space you have real emergency protection from the elements when you are engaged in mountaineering activities where speed and lightness are necessary. The Lot Jacket disappears when it is inside its small stuff sack. When you put it on, it protects you from wind and rain.

FABRICS>
The DWR finish helps repel water and dirt from the surface of the fabric. The K-Shell fabric with a waffle design offers increased stretch, eliminates the unpleasant feeling of fabric sticking to the skin, and also allows for greater compactibility. Insert under the arms for increased freedom of movement and greater breathability. All the zippers are YKK®.

FEATURES>
The simple under-helmet hood has a shaped visor and trim around the edge.
Minimalist front zip.
Front storm flap with integrated garage.
Chest pocket with zip.
Side pocket with invisible zip and stuff sack for the jacket.
Adjustable draw cord at bottom of jacket.
All the inner seams are double stitched for increased tear resistance.
Reflective detailing.
Stuff sack with zip and loop for attaching to harness.

PANT

CONCEPT>
Our lightest-weight pant. In very little space you have real emergency protection from the elements when you are engaged in mountaineering activities where speed and agility are necessary. The Lot Pant disappears when it is inside its small stuff sack. When you put it on, it protects you from wind and rain. You can put it on and take it off without removing your skis.

FABRICS>
The DWR finish helps repel water and dirt from the surface of the garment. The K-Shell fabric with an embossed effect allows for greater stretch, eliminates the unpleasant sensation of fabric sticking to your skin and increases compactibility. Two full side zips allow you to take of the pant without removing your skis. All the zips are YKK®.

FEATURES>
Minimalist full zip on sides.
Velcro closures with snaps at waist allow side zips to be opened for increased breathability.
Perforated elastic at waist.

THERMO FLEECE	

CONCEPT>
Excellent second layer for aerobic activity, thanks to the combination of technical fabrics. Perfect for use in the summer in place of a jacket.

FABRICS>
Fleece made with Thermo Fleece fabric, reinforced on the outside with ceramic printing and on the inside by a checked structure that increases breathability. The sides and underside of sleeves are made of highly breathable Thermo Fleece.

FEATURES>
Fleece with full-length YKK® zipper with zip garage.
Two zippered front pockets with zip garage.
Zippered chest pocket with YKK® zipper.
Elastic trim on hood.
Elastic trim on cuffs and bottom of garment.
Four-needle stitching.
Karpis wordmark on back.

CONCEPT>
Thermal second layer ideal for moderately cold situations, for use on summer excursions.

FABRICS>
Fleece made with Thermo Fleece fabric, which has a checked structure on the inside that increases insulation and makes the garment lighter weight. Open-weave fabric on the sides, underside of sleeves and center back to increase breathability.

FEATURES>
Full-zip fleece with YKK® zipper.
Two front zippered pockets.
Zippered chest pocket.
Zip garage.
Elastic trim at bottom of garment and ends of sleeves.

349

CONCEPT>
Our best-selling pant, the Rock, inspired this lighter-weight version, the Rock Fly. Featuring a mountaineering design and developed with three types of fabrics, it offers high breathability, rapid drying and significant stretch, allowing you to confidently deal with a wide range of situations.

FABRICS>
Made with K-Stretch with DWR treatment to help repel water and dirt from the surface of the fabric. Upper front and lower back made with double-structure one-way-stretch fabric that is extremely cool and breathable. Side and upper back made with lightweight double-structure two-way-stretch fabric that is highly breathable. In front, durable two-way stretch fabric with ripstop weave from the knee down. The crotch insert allows for great freedom of movement. All the zippers are YKK®.

FEATURES>
Elastic waistband with logo elastic on the inside, adjustable with a stretch draw cord.
Pockets with minimalist bonded zip with garage for decreased weight.
Two back pockets with zip.
Minimalist zip at bottom of leg with internal insert.
Reflective detailing.

CONCEPT>
Based on our best-selling Rock pant, we designed a climbing pant made with two types of fabric, the Rock Multiform Zip Off, which you can rely on with confidence in the most diverse situations. Thanks to the zippers, you can convert the pant into a Bermuda short without having to take it off.

FABRICS>
Made of K-Stretch fabric with a DWR finish that helps repel water and dirt from the surface. The fabric is doubled at the bottom to increase wear-resistance. The top and bottom front of the garment use one-way-stretch fabric. The knees and the back of the garment are in two-way-stretch fabric. The design of the crotch cut makes for full freedom of movement. All the zippers on this garment are YKK®.

FEATURES>
Waistband with fly and internal logo elastic, adjusted by means of a drawstring.
Pockets with Vislon® zippers for fast opening.
Invisible zipper on the front fly.
Back pocket closed by an invisible zipper.
No-slip elastic band at the bottom of the pant leg.
Reflective inserts.
Conversion zippers in a different color to make reassembly easier.

VETTA EVOW

JACKET

109

002

CONCEPT>
Technical three-layer HardShell jacket for mountaineering and climbing. Waterproof, highly compactible, extremely breathable and stretchy. The hooded Storm W is the garment you always need to have with you.

FABRICS>
The K-Dry membrane ensures a 20,000mm water column with breathability of 10,000g/m2/24 hours. The DWR finish helps repel water and dirt from the surface of the fabric. The double-layer gusset at the bottom keeps out rain that could enter the pants. The 15mm tape inside allows for improved breathability and a better appearance outside, with reinforcement in key points. All the zippers are YKK®. It has a technical fit, characterized by clean lines, and a carefully designed pattern to minimize the seams and taping.

FEATURES>
The hood is designed to be worn over the helmet, with a draw cord in the back for adjustment. Rigid visor with lining inside the hood. Waterproof front zipper and pockets for greater protection. Waterproof flap behind zip with fabric to protect chin. Pockets with waterproof zip, with trim and garage in K-Dry. Double layer at bottom of jacket with adjustable draw cord. Adjustable Velcro closure at wrist.

CONCEPT>
2.5-layer HardShell jacket. The Vetta Evo women's jacket is completely seam sealed, waterproof, compactible and breathable. It has an adjustable hood and stretch inserts to facilitate movement.

FABRICS>
The K-Dry membrane guarantees a 20,000mm water column with breathability measured at 18,000g/m2/24 hours. The DWR finish helps repel water and dirt from the fabric surface. The internal 15mm tape promotes better transpiration and better outward look. All the zippers on this garment are YKK®. It has a technical fit characterised by spare lines, accurately designed to reduce cuts on the garment to a minimum and reduce taping. The stretch inserts on the shoulders and hem increase freedom of movement.

FEATURES>
The hood is to be worn over the helmet and is adjusted by means of a drawstring at the back. The visor is stiff. The front zippers are waterproof for increased protection. Waterproof flap under the zipper, with fabric chin protection. Pockets closed by a waterproof zipper. Adjustable drawstring at the hem. Sleeve edge adjustment toggle. Protected air vent at the back. Stuff sack.

2500458 **LASTEI LIGHT W**

The Rocca is made from waffle-texture fabric with 40g PrimaLoft® Silver Active insulation. Stretchy and highly breathable, this jacket is ideal for any outing in windy or cold conditions. Highly compactible, so you can take it with you everywhere.

The DWR finish helps repel water and dirt from the surface of the fabric. The K-Shell fabric with a waffle design ensures great stretch and compactibility. The entire jacket is insulated with 40g PrimaLoft® Silver Active. Insert under sleeve for increased freedom of movement. All the zippers are YKK®.

The simple hood is designed to be worn under the helmet, with a shaped visor and trim around the edge.
Minimalist front zip with the flap behind forming the garage.
Two pockets with minimalist zip and garage.
Elastic trim on end of sleeve.
Adjustable draw cord at bottom of jacket.

CONCEPT > A windproof and water-repellent SoftShell jacket, the Lastei Light is made with warm PrimaLoft® Silver Active insulation in front and back for warmth and light weight. Highly breathable and compactable, it is ideal for any activity in cold and windy conditions.

The DWR finish helps repel water and dirt from the surface of the fabric. Front and back in 40g PrimaLoft® Silver Active secured with lines of stitching. Sides in stretch fabric with K-Shell inserts for greater comfort and breathability. All the zippers are YKK®. The cut under the arms is designed to allow you to raise your arms without pulling up the bottom of the jacket.

FEATURES>

- The hood is worn under the helmet and the stretch stitching makes it self-adjusting.
- Vislon® zipper for quicker opening.
- The flap behind the zipper forms the garage.
- Two pockets with zip and garage with minimalist look.
- Adjustable draw cord at bottom of jacket.
- Elastic trim on bottom of sleeve.

JACKET

102

570

168

002

CONCEPT>
The Wall is a SoftShell jacket with a thermal lining. Windproof and water repellent, warm and lightweight. Ideal for use in changing weather conditions.

FABRICS>
The DWR finish helps repel water and dirt from the surface of the fabric. The hood, the sleeve and the shoulder of the Wall Pro are in fabric with a waffle design with a 1,000mm water column. The side is in stretch fabric with K-Shell inserts for greater comfort and breathability. Mesh inserts in the lining increase breathability. All the zippers are YKK®.

FEATURES>
The hood is worn under the helmet and the stretch stitching makes it self-adjusting. Vislon® zip for faster opening. The windproof flap behind the zip forms the garage. Two pockets with minimalist zip and garage. Adjustable draw cord at bottom of jacket. Elastic trim at sleeve end.

CONCEPT>
Windproof, with detachable sleeves that do not hinder movement. This garment can be used as a jacket or a vest, while climbing or simply hiking uphill or downhill, in spring and also in summer, in the mountains, any time dynamic and comfortable protection is required.

FABRICS>
Elastic and breathable K-Shell jacket reinforced with Cordura® at the elbows, with detachable sleeves. It offers good temperature regulation also in very cold weather. The two-way-stretch fabric inserts under the sleeves and back enhance the wearer's freedom of movement. No-slip silicone print on the shoulders. All the zippers on this garment are YKK®.

FEATURES>
Front zipper for quicker opening. Wind flap in the front. Two front pockets with minimalist zippers. Drawstring at the bottom for adjustment. Sleeve zippers in a different color to make reassembly easier.

JACKET

409

002

409

287

CONCEPT>
The multifunctional Parete W Vest is perfect for any summer outdoor activity; its technical characteristics also allow it to be used for aerobic activity in the winter.

FABRICS>
Vest in wind-resistant, water-repellent and slightly stretchy K-Shell. Embossed outer surface with high abrasion resistance.

FEATURES>
Shaped collar for increased comfort.
YKK® Vislon® zipper for rapid opening.
Wind flap.
Two front zippered pockets.
Draw cord and elastic trim at bottom of garment.
Four-needle stitching for increased comfort.
Karpos wordmark printed on back.

CONCEPT>
Our lightest jacket. A true emergency shelter from the weather packed in a very small space, for when you're engaging in climbing activities that absolutely require speed and lightness. The Lot jacket disappears into its small stuff sack. When worn, it protects from wind and rain. It is a staple piece of climber's gear.

FABRICS>
The DWR finish helps repel water and dirt from the fabric surface. The K-Shell embossed fabric makes the garment highly stretchable, prevents the feeling of fabric sticking to the skin and enhances compactibility. Underarm insert for easier movement and improved breathability. All the zippers on this garment are YKK®.

FEATURES>
The simple under-helmet hood has a shaped visor and trim around the edge.
Minimalist front zipper with front flap with integrated garage.
Side pocket with invisible zip and stuff sack for the jacket.
Adjustable drawstring at the bottom.
All the inner seams are double stitched for increased tear resistance.
Reflective detailing.
Stuff sack with zip and loop for attaching to harness.

2500521 LOT JACKET

299

299

COLOR 194

CONCEPT> Our lightest and most compactible completely waterproof jacket. Take the Lot Rain Jacket along on every mountain excursion, whether you are climbing, hiking or ski mountaineering in the winter. It will keep you completely dry and help you maintain a constant body temperature when it starts to rain or snow or turns cold. This jacket was developed and tested by mountaineer Ueli Steck on his most challenging climbs.

FABRICS> Extremely lightweight 2.5-layer 100% nylon fabric, 50g per square meter, with a 20,000mm water column and 20,000g/m2/24h breathability. The DWR treatment helps repel water and dirt from the surface of the jacket. Made with waterproof YKK® zippers. The tape used for sealing the seams is 15mm for improved breathability and lighter weight.

FEATURES> Hood with rigid visor and wind seal around face, adjustable with a draw cord in back. Waterproof YKK® zipper in front with 3mm chain for lighter weight. Waterproof zipper flap with zip garage. Chest pocket with waterproof YKK® zipper that can be used as a stuff sack for the jacket. Chest strap with botton to limit opening when the zipper is open. Adjustable draw cord at bottom. Shaped no-sew cuffs for greater protection. Karpos wordmark on back of left shoulder and logo on right sleeve.

CONCEPT> Our lightest-weight jacket. In very little space you have real emergency protection from the elements when you are engaged in mountaineering activities where speed and lightness are necessary. The Loft disappears when it is inside its small stuff sack. When you put it on, it protects you from wind and rain.

FABRICS> The DWR finish helps repel water and dirt from the surface of the fabric. The K-Shell fabric with a waffle design offers increased stretch, eliminates the unpleasant feeling of fabric sticking to the skin, and also allows for greater compactibility. Insert under the arms for increased freedom of movement and greater breathability. All the zippers are YKK®.

FEATURES> The simple under-helmet hood has a shaped visor and trim around the edge. Minimalist front zip. Front storm flap with integrated garage. Chest pocket with zip. Side pocket with invisible zip and stuff sack for the jacket. Adjustable draw cord at bottom of jacket. All the inner seams are double stitched for increased tear resistance. Reflective detailing. Stuff sack with zip and loop for attaching to harness.

LOT RAIN 2500823 PANT

CONCEPT>
Our lightest and most compactible completely waterproof pant. The Lot Rain Pant is ideal for any mountain excursion, whether you are climbing, hiking or ski mountaineering in the winter. It will keep you completely dry and help you maintain a constant body temperature when it starts to rain or snow or turns cold. This pant was developed and tested by mountaineer Ueli Steck on his most challenging climbs.

FABRICS>
Stretchy K-Dry fabric with a membrane, with a 20,000mm water column and 20,000g/m2/24h breathability. The DWR treatment helps repel water and dirt from the surface of the fabric. The seam-sealing tape inside is 15mm for improved breathability and lighter weight. Uses YKK® zippers.

FEATURES>
Waterproof YKK® side zippers to knee. Elastic waistband with draw cord on inside. Stretch panel on upper back for greater breathability and improved fit. Inside mesh pocket at back to be used as a stuff sack. Elastic at bottom of legs.

LOT 2500561 PANT

CONCEPT>
Our lightest-weight pant. In very little space you have real emergency protection from the elements when you are engaged in mountaineering activities where speed and agility are necessary. The Lot Pant disappears when it is inside its small stuff sack. When you put it on, it protects you from wind and rain. You can put it on and take it off without removing your skis.

FABRICS>
The DWR finish helps repel water and dirt from the surface of the garment. The K-Shell fabric with an embossed effect allows for greater stretch, eliminates the unpleasant sensation of fabric sticking to your skin and increases compactibility. Two full side zips allow you to take of the pant without removing your skis. All the zips are YKK®.

FEATURES>
Minimalist full zip on sides. Velcro closures with snaps at waist allow side zips to be opened for increased breathability. Perforated elastic at waist.

094

002

CONCEPT>
Our comfortable and durable Stone Short is our most innovative short, suitable for the most difficult situations. Cool, comfortable and stretchy, with Cordura® reinforcements to provide maximum tear resistance and freedom of movement. Suitable for hiking or for adventure biking in combination with the liner short with seat pad, and with the possibility of inserting protections.

FABRICS>
Made with the very innovative K-Stretch Plus, a lightweight, DWR-treated fabric that is both water- and dirt-repellent. The short stretches, with a smooth and structured look where the Cordura® is, and is cool and light, offering total freedom of movement. All the zippers on this garment are YKK®.

FEATURES>
Zippered fly with an internal hook to avoid points of entanglement outside.
Two open front pockets.
One front pocket with minimalist zipper and mesh inside.
Side zippers with internal gusset to hold protections.
Adjustable elastic band at the waist.
Reflective inserts.

CONCEPT>
With their fresh and colorful look, the Rapid Baggy Short is a durable, comfortable and stretchy garment suitable for the most demanding rides. Cool, comfortable and with double ripstop inserts to provide maximum tear resistance and freedom of movement. Suitable for hiking or for adventure biking when worn over the liner short with seat pad.

FABRICS>
Made of two DWR-finished K-Stretch fabrics that help repel water and dirt from the fabric surface. The first stretch fabric has a smooth, cool and light appearance, and the second is a two-way-stretch ripstop fabric for complete freedom of movement. This garment has two YKK® zippers.

FEATURES>
Zippered fly with an internal hook to avoid points of entanglement outside.
Two front pockets with a minimalist zipper and mesh inside that can also be used for ventilation.
A back pocket with a minimalist zipper.
Front flapless zipper for faster opening, internal flap.
Adjustable elastic band at the waist.
Reflective inserts.

CONCEPT

Our lightest jacket. A true emergency shelter from the weather packed in a very small space, for when you're engaging in climbing activities that absolutely require speed and lightness. The Lot jacket disappears into its small stuff sack. When worn, it protects from wind and rain. It is a staple piece of climber's gear.

FABRICS

The DWR finish helps repel water and dirt from the fabric surface. The K-Shell embossed fabric makes the garment highly stretchable, prevents the feeling of fabric sticking to the skin and provides enhanced compressibility. Underarm insert for easier movement and greater breathability. All the zippers on this garment are YKK®.

FEATURES

The simple under-helmet hood has a shaped visor and trim around the edge.
Minimalist front zipper with front flap with integrated garage.
Side pocket with invisible zip and stuff sack for the jacket.
Adjustable drawstring at the bottom.
All the inner seams are double stitched for increased tear resistance.
Reflective detailing.
Stuff sack with zip and loop for attaching to harness.

2500683 BALLISTIC EVOW

SHORT

168

108

CONCEPT>
If you want a durable, comfortable and stretchy short for challenging routes, the Casatsch is for you. Cool, comfortable and in double ripstop for maximum tear resistance. Designed to offer complete freedom of movement. Removable inner short.

FABRICS>
Made with two K-Stretch fabrics with DWR finish to help repel water and dirt from the surface of the fabric. The first is a durable-stretch fabric with a double ripstop weave, and the second is smooth, cool and lightweight. Removable inner mesh short designed for maximum freedom of movement and breathability. The short has two YKK® zips.

FEATURES>
Elastic waistband with quick-pull zipper, logo elastic on the inside, and hook inside to eliminate fasteners on the outside.
Open front pockets with soft fabric trim.
Covered front zip with no external fly for quick opening, with internal flap.
Two open back pockets.
Two side map pockets with zip.
Vent opening with minimalist zip.
Adjustable draw cord at bottom of leg.
Reflective detailing.

CONCEPT>
The Ballistic Evo W is a durable, comfortable and stretchy short for the most demanding rides. Cool and comfortable, with two-way-stretch ripstop fabric inserts for maximum freedom of movement. Suitable for hiking or for adventure biking when worn over the inner short with seat pad.

FABRICS>
Made of two K-Stretch fabrics with a DWR finish to help repel water and dirt from the surface. The first stretch fabric has a smooth, cool and light appearance, and the second is a two-way-stretch ripstop fabric for complete freedom of movement. This garment has two YKK® zippers.

FEATURES>
Zippered fly with an internal hook to avoid points of entanglement outside.
Front pockets with minimalist zippers.
Front flapless zipper for faster opening, internal flap.
Adjustable elastic band at the waist.
Reflective inserts.

POLARTEC® Alpha	Polartec® Alpha® is the latest evolution of synthetic insulation offering a rare combination of lightweight warmth and true breathability in a “puffy” style garment. Alpha® creates insulating loft but does not require down proof fabrics, allowing a sandwich construction with mesh and breathable fabrics for performance that’s not available in traditional insulation.
POLARTEC™ DELTA	Polartec Delta™ fabrics sit in the sweet spot or Goldilocks zone between cotton and polyester. They exhibit a comfortable cooling pattern similar to cotton, but act more like polyester for dry times and maintaining breathability when wet.
POLARTEC® POWER DRY®	Highly breathable fabric that is comfortable against the skin and ensures warmth without weight. Keeps the skin dry and also dries quickly on the outside.
PRIMALOFT® GOLD	The highest performing insulation on the market for warmth, water resistance, softness and compressibility. PrimaLoft® Gold is an ultra-fine microfiber insulation that is as warm, soft and lightweight, and is warmer wet or dry than all other insulations.
PRIMALOFT® SILVER	Primaloft Silver is a synthetic insulation with very high loft and excellent thermal properties. It offers a very high warmth to weight ratio, it is very supple and extremely packable. Its insulation capacity and its highly water resistance keep the wearer warm even in wet conditions. Comfort and thermoregulation are enhanced by its high level of breathability. We have selected Primaloft Silver because it is well suited for the changing weather conditions of the outdoors.
PRIMALOFT® SILVER ACTIVE	Introducing breathable insulation for active lifestyles. Specifically designed to resist migration, the permanent water-repellent ultra-fine fibers in Primaloft® Silver Insulation Active deliver exceptional softness, warmth and loft, along with superior water resistance. This highly-breathable insulation doesn’t limit fabric choices, comfort levels or seasons.
PERTEX® Microlight	Lightweight, durable shell fabric that is abrasion resistant, windproof and has a soft feel. Breathable and water resistance for increased comfort and protection outdoors.
DYNEEMA®	High-density polyethylene sewing thread. Lightweight and with extremely high tensile, torsional and bending strength. Dyneema® is a registered trademark of DSM.
KOOL MESH	Used for the liner in our baggy shorts, our Kool Mesh keeps you cool and comfortable with just the right amount of compression.
KORTEC	Two-way-stretch fabric in reinforced ripstop Cordura®; lightweight, very strong and breathable; ideal for reinforcements.
K-Dry	The K- Dry family of fabrics are developed to offer protection from wind, rain and wet snow. Different features include lightweight, abrasion resistance, compactability and breathability.
K-HARDTEC	Particularly comfortable, compact and durable fabric for jerseys that stands up to the most challenging tests, such as contact with rocks or Velcro. The ultimate in durability.
K-SENSE	Soft to the touch and highly elastic to allow full freedom of movement, these fabrics are characterized by their light weight, durability, high breathability and rapid drying.
K-SENSE PLUS	The technological evolution of fabrics that feel soft on the skin and stretch to allow free movement, and are characterised by a different warp, lightness, strength, high breathability and quick drying.
K-SHELL	A family of tightly woven and stretchy fabrics that offer a high degree of protection from the elements. Depending on their structure, these lightweight and extremely durable fabrics supply sufficient insulation, excellent wind resistance, water repellency or rapid drying, without sacrificing breathability and freedom of movement.
K-STRETCH	Family of fabrics that are extremely lightweight, durable and stretchy and that provide a high degree of airflow and moisture wicking despite being resistant to wind and water. Lightweight protection to ensure comfort during physical activity.
K-STRETCH PLUS	A revolutionary fabric with an innovative structure: two yarns, one Nylon® and one Cordura®, with different cross sections, are threaded together to form seamless raised bands that provide protection, elasticity and breathability. This is a new frontier of design, a leap forward that joins technology and fantasy to create the product of the future
THERMO FLEECE	Fleece offers one of the best weight to warmth ratios. Our different Thermo Fleec fabrics have varying wiegths but all have great warmth, durability and comfort. Can be used for an outer layer or as a mid insulation layer in more severe winter conditions.
BODYFIT PRO ADVENTURE	Developed for a more upright riding position and occasional walking for our Adventure Bike line, this pad features infinitely variable thickness that puts 13mm of foam under your sit bones but almost no padding along the front and wings, making it ideal while on the bike but less noticeable when off the bike.
