uvex is one of the world's leading producers of protective products and has global manufacturing expertise.

Cutting-edge technologies and solutions, customer-oriented service, best-in-class production and testing for personal protective equipment. These are the reasons everyone who places their trust in us benefits from the best possible protection for sports, leisure, and at work.

“Made in uvex” is our promise of quality. For this reason, we set demanding standards for our products, our production facilities, and our network of partners.

At uvex, people are our primary focus: whether a customer, employee, or partner. We work to balance economy, ecology, and social commitment and follow the philosophy of “business is people.”

Dominik Paris

alpine ski racer

super-G, downhill,
alpine combined

Wide panorama

Exceptionally wide construction and super slim frame design for an extremely wide field of view. The eyes can see the environment even more comprehensively and intensively.

Perfect fit

Swivel system on the goggle frame ensures superb fit on the face, improved draft protection, and great aerodynamics.

Antifog

uvex supravision® coated lenses provide long-lasting freedom from fogging.

Full mirror lens

Full mirror lens reduces distracting glare and protects against harsh sunlight.

These goggles make the difference. Innovative construction is combined with the latest technology for a spectacular wide field of view, in the highest quality, and improved aerodynamics.

A swivel system on the frame, and optimized frame contours, mean these goggles sit even more closely to the helmet.

For more freedom from drafts, and optimized aerodynamic performance, even at the highest speeds.

uvex supravision® lens coating keeps lenses permanently fog-free.

uvex contest goggles are available in two versions. **uvex contest FM** has a full mirror lens, which protects from distracting reflections and harsh sunlight.

uvex contest has a lasergold lens which increases contrast, and improves vision, in poor weather and low light.

At a glance, uvex contest shows just how good a goggle can be.

Best in sight.

+ uvex contest collection at a glance.

For a polished performance.

A real eye-catcher. uvex iconic series combines striking chrome design with cutting-edge uvex technologies.

The philosophy behind our technology is based on three components: optimized protection, perfected fit, and highest possible comfort.

technology helmets

protection // fit // comfort

[tested to standards | tested for safety]

Guaranteed safety

Anyone who wears a uvex helmet for winter sports travels on the side of safety. Because each of our winter-sports helmets undergoes rigorous tests in the uvex testing center.

So that we can guarantee the quality and function of our helmets. At the same time, our test procedures help develop the uvex helmets of tomorrow.

[material]

High-tech in every layer

Outer material

PC
inmould
Safety thanks to the securely bonded polycarbonate shell.

CFK
hardshell
Polymer reinforced with carbon fiber, for high-end helmets with low weight.

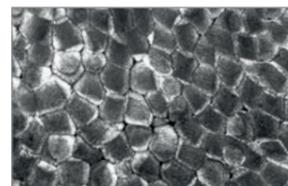

ABS
hardshell
Proven technology has a hard shell for highly effective protection.

+technology
hardshell // hybrid
Innovative, extremely light, and safer special polymer.

Inner material

EPS
hardshell // inmould // hybrid
Protective material made from microscopic air chambers, which absorb the incident forces of an impact.

[shell construction]

The best of the best

[hardshell technology]

An injection molded outer shell and EPS inner shell create a highly effective safety combination: impact resistant exterior, shock absorbing and insulating interior.

This complex construction allows perfectly placed, closable air vents and channels to be built-in, and exceptional wearing comfort.

[hybrid technology]

Advanced technology bonds a durable hardshell outer helmet to an inmould lower section, and combines them with an EPS inner shell.

Advantage: ample space for vents and channels, for perfect ventilation.

[inmould technology]

Protective EPS material is foamed directly into the polycarbonate shell.

It creates a lightweight helmet with highest impact resistance. A perfect fusion of polycarbonate outer shell and EPS inner layer.

[+technology]

Even lighter,
even safer

MADE IN
GERMANY

lighter
than standard
ABS helmets

15%

plus
technology

16%

more
impact value
than required by
the helmet standard

+technology stands for
a specially developed
thermoplastic polymer.

The outer shell is
exceptionally light, yet
extremely tough and
impact resistant: uvex
ultra-modern thin-wall
injection molding makes
this possible.

The helmet combines
protection with best
comfort, and is perfect
for outdoor use in all
climates.

[Boa®]

All new, all improved, all Boa®

The unique Boa® system combines an ingeniously simple system
with high performance materials from the aerospace industry –
for noticeably improved comfort and safety.

High-tech partnership
with Boa® Technology Inc.

Flexible polyamide (PA)
bands are built into three
sides of the helmet
and ensure optimal fit
on the head.

Fine tuning adjusted
to the millimeter

Secure fit via ratchet dial

Easy

The Boa® wheel can be
adjusted with one hand.

Comfortable

1 click = 1 mm. For the
perfect fit on every head.

Safe

The selected setting stays.
For reliable safety.

[uvex IAS | uvex IAS 3D]

Precise adjustment

uvex helmets with uvex IAS
system can be adjusted in
width. After all, everyone
has their own head shape.

Heads don't only differ in
circumference; they also
differ in height.

The uvex IAS 3D system offers
the extra feature of precise
adjustment to individual head
height.

Width adjustment

uvex IAS // uvex IAS 3D

Adjusts to the individual
head circumference

Height adjustment

uvex IAS 3D

Adjusts to the individual
head size

[uvex octo+ technology]

There's a uvex octo+ inside

The system with everything.

uvex octo+ is the first fully automatic fit system for ski helmets. Its flexible fins cocoon the head on all sides and adapt to its shape without further adjustment.

Unique in the market, this patented system works independently of head or helmet shape. Comfortable to wear and the helmet always sits perfectly.

MADE IN GERMANY

Find out more:
uvex-sports.com/octo

01

Fine-tune adjustment
Stretchy wrap around strap has three grades for manual fine tuning.

02

Flexible fins
Individual fins for perfect fit and exceptional comfort.

03

Soft feel
Comfortable material ensures pure sport experience, with no scratching or itching.

04

Ample fresh air
Air can circulate freely between the EPS inner shell and uvex octo+. For optimum ventilation.

uvex octo+ available in two helmet models

uvex octo+ technology sets a new level in helmet adjustment.

Now in its third winter season, this revolutionary system is available in two uvex product families: uvex JAKK+ octo+ and uvex jimm octo+.

uvex JAKK+ octo+
page 54

uvex jimm octo+
page 57

[shell sizes]

Fits all heads

Large or small, round or square, the uvex range has the right shell size for every head.

[fit systems]

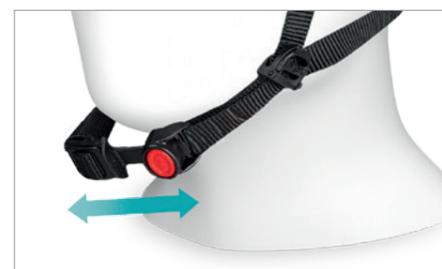

uvex IAS systems, Boa® and octo+ for an individual fit

With its advanced fit systems, uvex offers the perfect individual fit for every head shape.

uvex has the best all-round package for the perfect fit – with a range of shell sizes and fit systems to adjust even the smallest detail.

Different head shapes yet the same head circumference → Individual adjustment via uvex fit systems

[monomatic]

Button-press adjustment

The uvex monomatic comfort lock can be opened and closed with one hand.

[vent system]

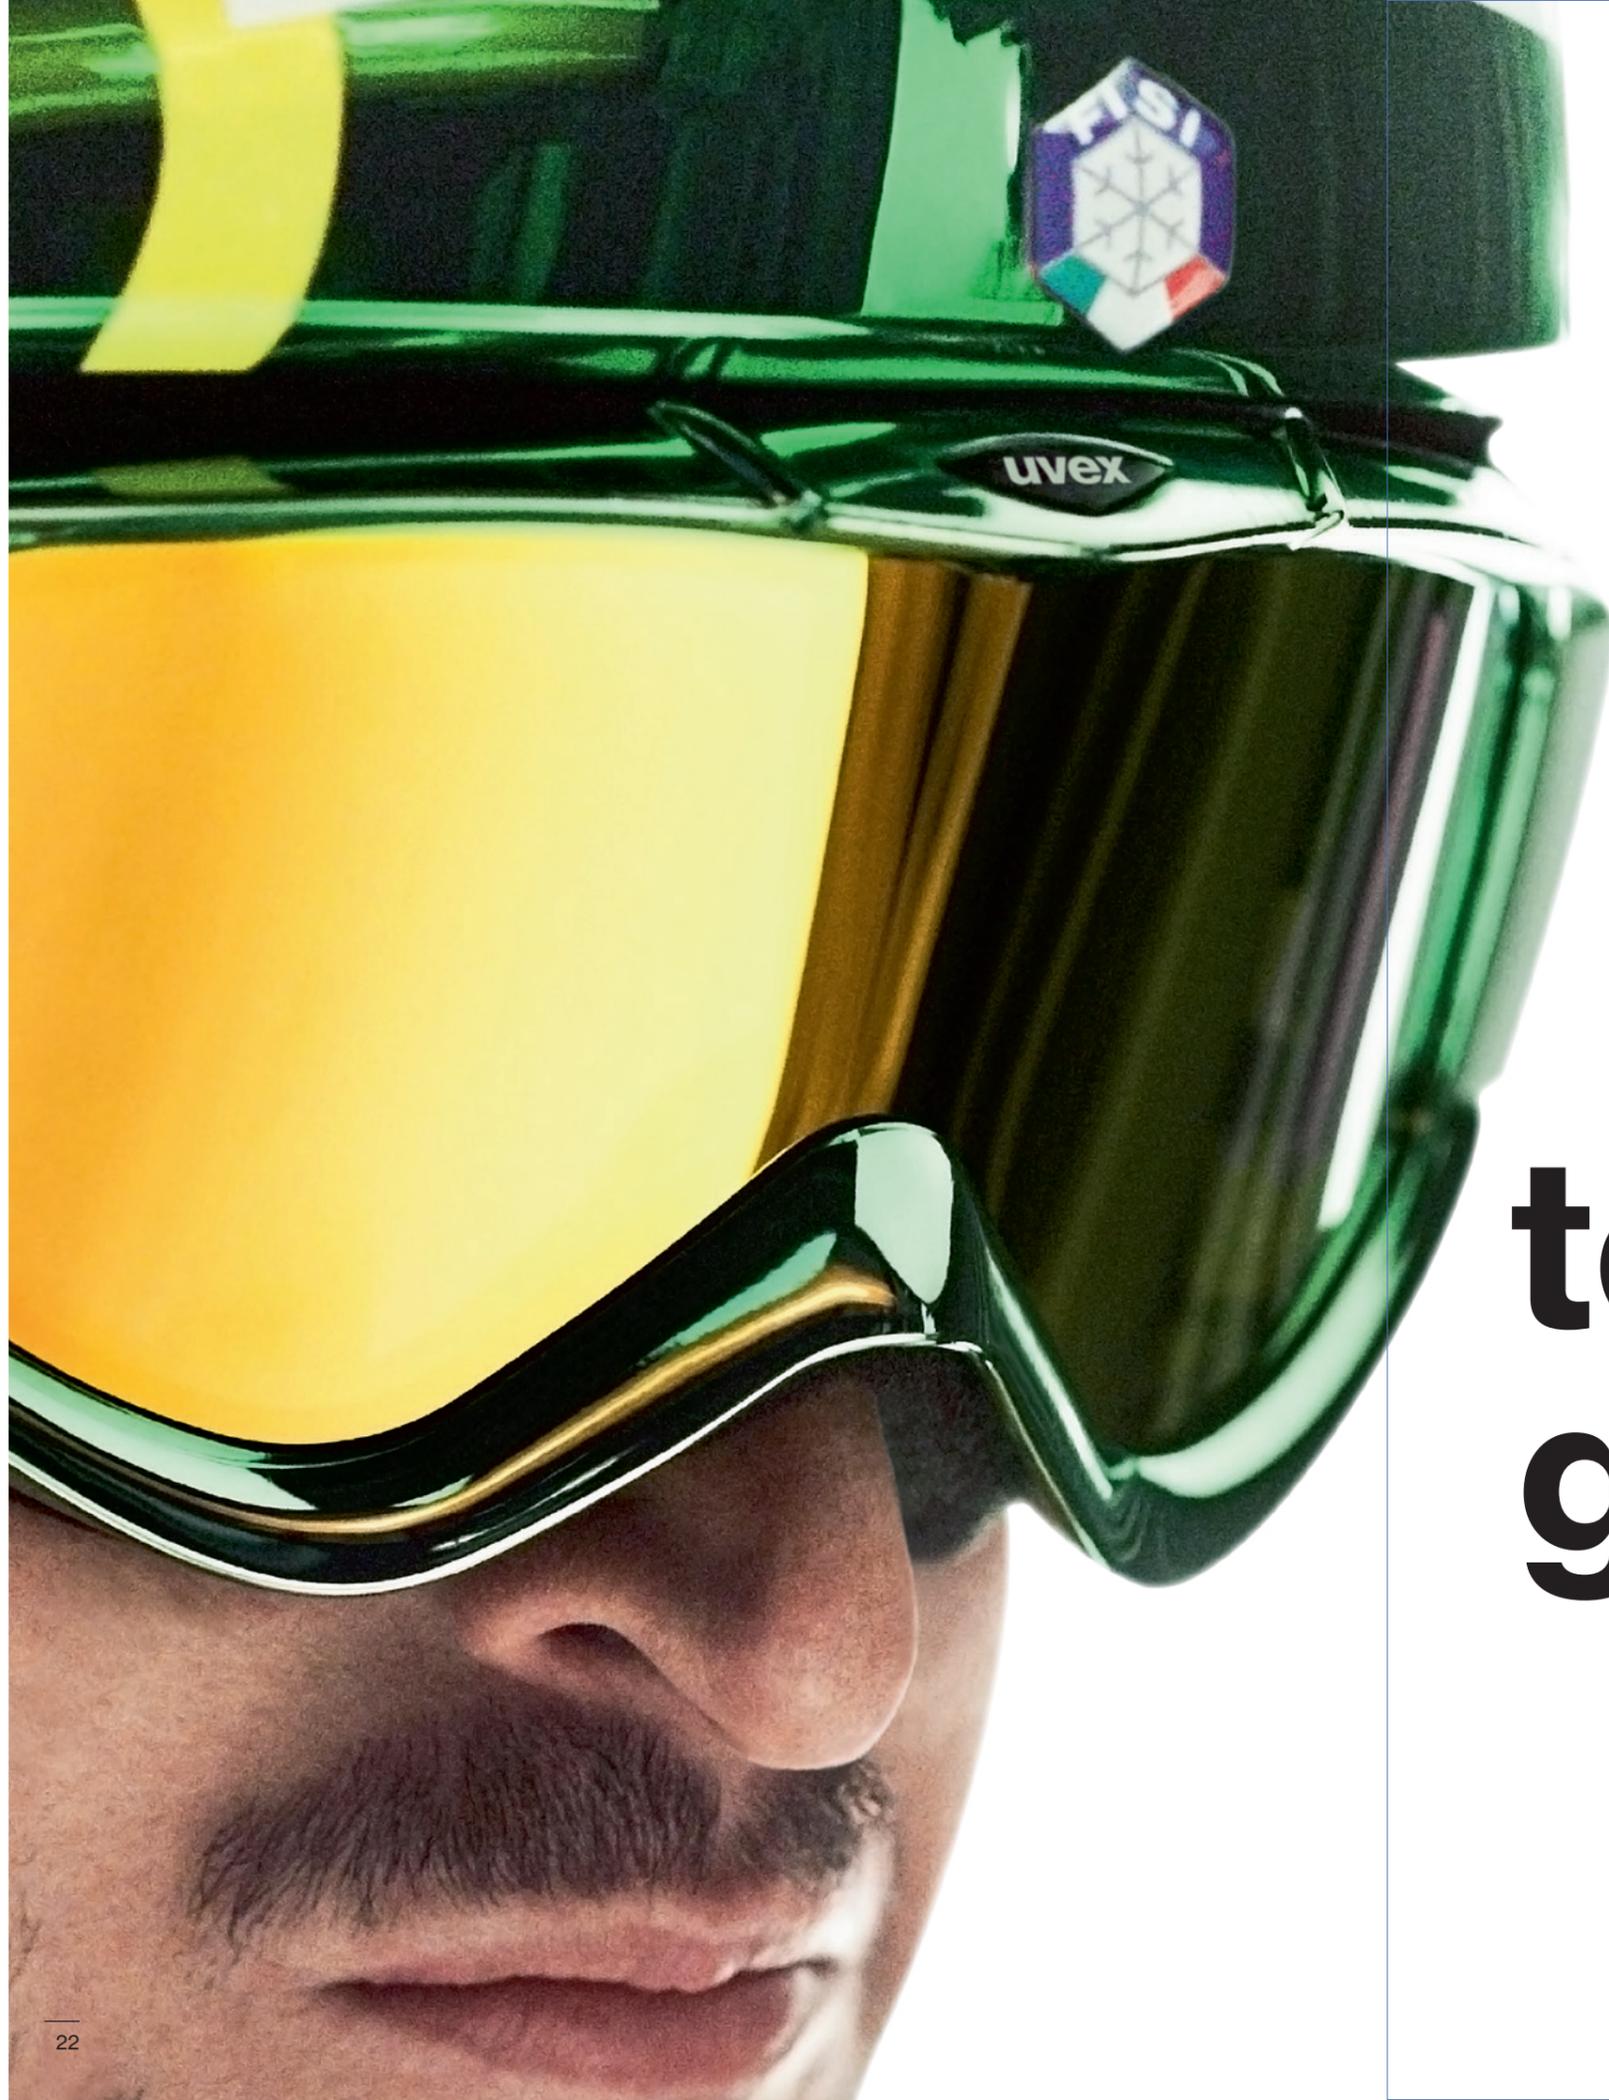

Optimized ventilation

uvex places the highest value on optimal ventilation: cleverly designed ventilation channels draw in fresh air and expel warm air.

Uncomfortable heat build-up is thus avoided.

- Fresh breeze**
Front vent openings draw fresh air through built-in ventilation channels.
- Closable vent system**
Open provides optimal cooling when it is warm, closed keeps the head warm and dry.
- Cool head**
Exhaust ports efficiently conduct warm air away.

The philosophy behind our technology is based on three components: optimized protection, perfected fit, and highest possible comfort.

technology goggles

protection // lens // comfort

[break resistant]

Maximum safety

uvex goggles are tested in accordance with standard DIN EN 174:2001. This includes the demanding impact test, in which a 6mm steel ball weighing 0.86g is fired at the lens at a speed of 45m/s (162 km/h).

This test shows that mechanical strength is guaranteed. The lens does not shatter, and the eye cannot be hurt by splinters.

Dent in test lens after undergoing an impact test – the steel ball does not pass through the lens.

Impact testing equipment in the uvex testing center.

[UV protection]

uv-ex = ultraviolet excluded

visible light from 780 – 380nm

UV light (UVA, UVB, UVC)

UV-absorbing filters built directly into the raw material protect the retina 100% from damaging UV rays up to 400 nm.

All lenses give 100% UVA, UVB and UVC protection. It is also the basis of our company name.

uv-ex = ultraviolet excluded

4 tint levels

[variotronic®]

Perfect tint for every light condition

Automatic or manual. In just 0.1 seconds.

uvex creates one of the world's most technically advanced ski goggles with revolutionary, innovative variotronic® technology built-in.

An ultrasensitive light sensor changes lens color and transmission level in just a fraction of a second – automatically or at the touch of a button.

This revolutionary lens technology is part of our exclusive partnership with American experts at AlphaMicon® und e-Tint®.

powered by

01

Liquid crystal film

Liquid crystals are electrochromatically activated and darken the lens.

02

Light sensor

Built-in sensor automatically reacts to light intensity.

03

Push button

Choose from three lens tinting modes: on, off, automatic.

04

USB battery

Lithium ion battery charges via mini USB and lasts up to 30 hours.

ISPO AWARD GOLD WINNER 2014/2015

Find out more: uvex-sports.com/variotronic

Find out more:
uvex-sports.com/variomatic

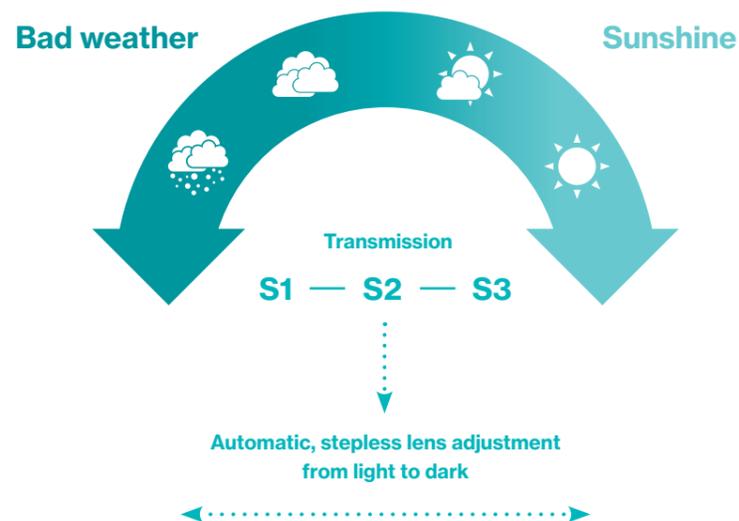

[variomatic®]

Automatic lens tinting

variomatic® lens technology automatically reacts to every light situation.

Photochromic lenses alter the tinting in three levels of protection from S1 to S3.

All uvex lenses provide 100% protection from UVA, UVB and UVC rays.

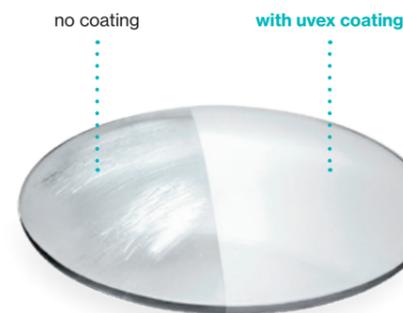

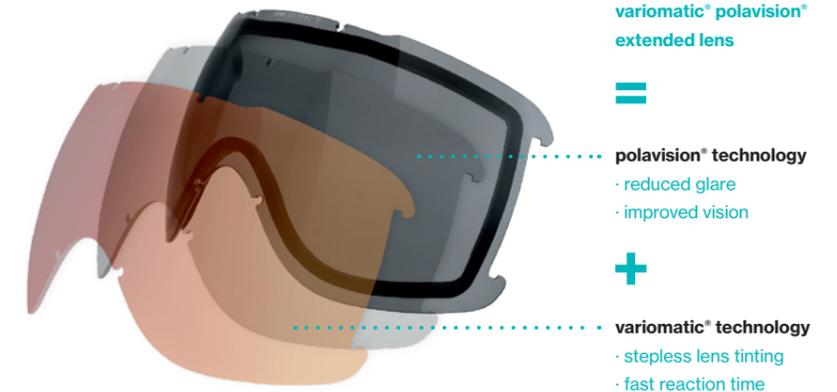

[variomatic® polavision® extended]

Vision twice as good

variomatic® polavision® extended combines the advantages of two technologies in one lens.

So you are perfectly equipped for every light condition and good vision is guaranteed.

[robust and scratchproof]

Protection against scratches

Extremely durable polycarbonate lenses work in temperatures down to -40°C / -40°F with no loss of mechanical strength.

Special coating creates a scratch resistant outer lens, in accordance with standard EN 1836 (excludes mirror lenses).

[decentered lens technology]

Distortion-free

Distortion and warping can cause visual interference.

Designed for the toughest demands of winter sports, uvex class 1 injection molded, decentered lenses deliver clear vision, in accordance with EN 174.

With decentering - distortion-free view

Without decentering - distorted view

[polavision®]

Superior perception

Reliable protection against reflections and glare: polavision® lenses absorb scattered light and protect the eyes from strain.

polavision® eliminates distracting reflections and transforms glare into pleasant light.

[take off]

Flexible changes

The interchangeable lens attaches to the goggle lens via magnets. It transforms ski goggles for bright sun into ski goggles for bad weather, in an instant.

Simply pull off the top lens: super thin and flexible, it fits in any pocket.

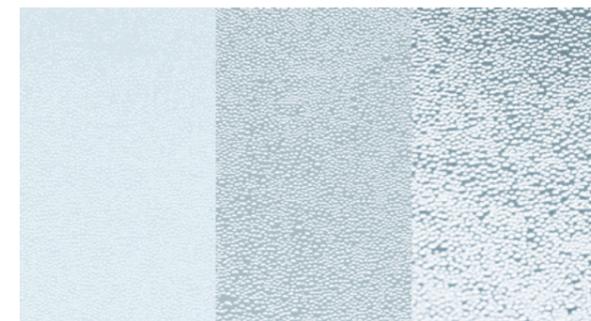

[supravisión®]

Clear view at all times

Ultimate antifog coating

Close-up view of a fogged lens

Best vision thanks to the unique uvex supravisión® coating: it doesn't alter the optical quality of the lens, and 100% exceeds standard EN 174 for lens fogging.

Under test conditions, uvex supravisión® coating stayed fog-free for a whole 60 seconds. For even more safety and the clearest view, even in bad weather.

				Nose height

uvex goggles are divided into size categories. In the uvex fit index models are grouped into three face widths and three nose heights.

Use uvex goggle finder to quickly and easily measure your face and find your perfect goggle.

Goggle finder

Measuring device for individual fit to nose height and face width.

The philosophy behind our technology is based on three components: optimized protection, perfected fit, and highest possible comfort.

technology protectors

protection // fit // comfort

protectors // technology // protection // fit // comfort

[SAS-TEC] Reliable all-round protection

Multi-impact material guarantees protection even during repeated impacts, or sustained pressure on the same area. After an impact, the viscoelastic foam quickly returns to its original shape.

SAS-TEC
body protection systems
In partnership with SAS-TEC

[diamond anchor] Dependable connection

A diamond anchor sits between the shoulder blades. It maintains a secure connection between body and protector, even during movement.

[d-strap] Custom length

Side straps run laterally beside the latissimus. They provide flexible adjustment and prevent riding up.

[ductile] Flexible straps

Three flexible straps connect the lower and upper part of the back protector together. So, the protector always stays firmly in place, yet allows freedom of movement.

[coccyx protector] Ideal fit

Ideal fit

The padded surface of the coccyx protector features a special honeycomb design. So, the pad always molds perfectly to the contours of the tailbone and buttocks.

developed with champions.

uvex contest goggle

With these goggles, the developers had a clear goal from the outset: uvex contest should set a new level in visual quality. To achieve this, our engineers' know-how was combined with the experience of some of the world's best skiers.

uvex's research and development team worked closely with World Cup athletes Dominik Paris, Max Franz and Victor Muffat-Jeandet. In joint workshops, athletes explained their ideas and described the demands that goggles are subjected to in races and extreme

conditions. uvex experts gained valuable new insights, which were incorporated in the latest prototypes and then perfected with further testing. More athletes got involved, including Olympic champion Eric Frenzel, who evaluated these goggles from the perspective of Nordic combined.

"Working closely to develop goggles isn't just great fun," says Hannes Reichelt, the super-G World champion from Austria. "We benefit too. With uvex, athletes gain a head start for the next race."

ENGINEERED IN
GERMANY

The new ski mountaineering helmet
uvex p.8000 tour combines comfort
with performance.

Extremely light, great ventilation, plus comfortable
fit thanks to Boa® adjustment. Includes RECCO®
avalanche rescue system and meets the helmet
standards for skiing EN 1077 B, cycling EN 1078
and mountaineering EN 12492.
